

# INTRODUCTION TO MAPINFO PROFESSIONAL AND DISCOVER

***What will this course allow me to do?***

A two day introduction course for clients with little or no knowledge of MapInfo Professional and/or Discover desktop GIS mapping software. The course will begin with an overview of the basic MapInfo Professional user interface, opening and displaying different types of GIS data, making data selections and queries through to editing and creating new data. A must for anyone who wants to learn the basics of computer mapping in a relaxed and friendly atmosphere.

***Prerequisites?***

We ask that you have sound working knowledge of Windows and that you are familiar with tool button and menu driven applications before attempting this course

***Features and Topics Covered***

- MapInfo Professional/Discover User Interface
- Tables and Workspaces/Projections
- Layer Control
- Opening & Importing Data
- Selecting & Querying Data
- Creating & Editing Data
- Map Making
- Thematic Mapping

***Duration***

2 days
